To safe guard our Hotel, images are constantly monitored by our camera team in Cardiff. These cameras are designed to protect our customers and staff. We have at least two cameras in each room, around the gardens and the car park. The entire building and grounds, entrances and exits are all covered by a total of 36 cameras.

Castell Security Systems have over 30 years experience so we can all feel safe in the knowledge that they are watching us 24 hours a day, if we at the Halfway Hotel do not pick up on a problem, then we can be sure that Castell Security staff in Cardiff will see the problem themselves and either notify us immediately or press our panic alarms so the emergency services will be notified.

Halfway Hotel is also part of a Pubwatch programme which includes pubs and hotels around the area such as Tafarn Y Felin, The White Lion, Neville Arms, The Royal Oak, Harry Watkins, Dafen Cricket Club, The Diplomat Hotel, Calsonic Club, The Greyhound, The Bush Inn, Halfway Hotel Bynea RFC, Gateway Caravan Park, Lewis Arms, Royal British Legion, The Bell, Red Cow Inn, Joiners Arms, Smiths Arms, Franky and Benny's, Pemberton Beefeater, Bryn and Trallwm. All pubs and hotels in the Pubwatch programme must have CCTV systems installed throughout their buildings, which can be downloaded by the police if need be, and also are provided with walkie-talkies connected to one another. All CCTV systems are state of the art Thermal Cameras, which means they can still monitor the building and surrounding areas in the dark, so nothing goes un-noticed.
